

## ABSTRACT

An apparatus is disclosed which is configured to announce a transmission from a caller by vibrating in a predetermined manner associated with the caller.

Also disclosed is a method comprising: receiving a transmission from a first caller; identifying the first caller; and vibrating a device in a predetermined manner based on said first caller's identity.

1. A method comprising: receiving a transmission from a first caller; identifying the first caller; and vibrating a device in a predetermined manner based on said first caller's identity.
